Summary

Front-end web developer specializing in responsive, modern, and scalable web applications using React, Angular, TypeScript, and Tailwind CSS. Work emphasizes clean code, strong user experience, and reliable performance.

Experience includes developing complete systems, such as e-commerce platforms, admin dashboards, and management systems. Focus is on building products that are both easy to use and maintain, following best practices in design, development, and code structure for long-term quality.

Currently pursuing a bachelor's degree in computer science at Tanta University while actively working as an independent frontend developer, delivering high-quality solutions to clients worldwide.

Work experience

Independent Frontend Developer

August 2023

- Developed 15+ responsive web applications using React.js and Angular
- Improved application performance by 40% through code optimization
- Collaborated with cross-functional teams to deliver projects on time
- Implemented modern UI/UX designs with pixel-perfect precision
- Maintained 98% client satisfaction rate across all projects
- Built reusable component libraries for faster development cycles
